

This is a request regarding 02-278 for the FCC to NOT implement any proposal that would lessen the state of Indiana's Telephone Privacy law protections.

Since that law went into effect law the number of telemarketing calls has decreased significantly which has noticably improved the quality of our home environment. We can eat a meal without being interrupted by a telemarketing call.

I used to receive 6 - 12 calls per week, now I only receive only one or two. Please do not adopt anything that will "water down" the benefit we have received from Indiana's current law. If you must change anything make it MORE restrictive rather than less for telemarketing calls.
